REMINDER

Dear Sir,

The benefits of this workshop are the following:

* Although it is a one week workshop, only one day of contact session is required, as most of the work can be done during the spare time. As a result, your faculty members will have to be away from their routine work for only one day.

* Having the animation skill set will improve the capability to create educational animation, especially useful in lab courses.

* Socially relevant animations will become very important in coming days - see here one such animation on the importance of masks during the COVID pandemic: https://www.youtube.com/watch?v=ltjBT_TuUVA - doing an animation course is a first step towards this capability.

* The capability attained in this workshop will help in building computer games.

* The capability attained in this workshop will help create animation movies of general interest, which in turn can open many avenues.

Regards,

PROF (DR.) P.M KHODKE
